Stability Statement 1

Part Number: [33820-BTB/L](#)

Product Description: Ammonia Leak Detection Cloth

The cloths should be stored sealed in the amber bag it was supplied with in a cool, dry place out of direct sunlight. The ideal condition is 25C (77F). A range of 20C (68F) - 30C (86F) is acceptable. Cloths should not be stored in a refrigerator or freezer. Detection cloths should not be stored where they can be exposed to heat (for example, inside a vehicle or shed).

When stored properly, the ammonia detection cloths have a minimum shelf-life of 2 Years from the date of manufacture. Under proper storage conditions the cloths will continue to perform properly beyond the expiration date.
